

Combining autonomous unmanned aerial vehicles (UAV), video capture and advanced machine learning video analytics to produce high quality transportation data.

- ✓ AUTONOMOUS AERIAL OPERATIONS
- ✓ HIGH RESOLUTION VIDEO CAPTURE
- ✓ 4G/5G CONNECTIVITY
- ✓ OPTIMISED FOR PRIVACY
- ✓ LONG-RANGE FLIGHT

YOUR DATA NO COMPROMISE

TRANSPORTATION ASSESSMENT

Large scale operations are no problem. VIEWS produces the full picture preserving continuity and a high level of detail over your whole area of study.

CITY-WIDE TRAFFIC COUNTS

We provide robust data for smart cities at a fraction of the cost. Our drones in the sky blanket a city or region making data capture quick and efficient.

DATA ON-DEMAND

Immediate cloud based access to all the data we capture. No need to go through a lengthy request process to get the data you need.
